We have put together a simpler method for our customers to create that final pdf file needed to seamlessly flow through our pre-press processes.

It consists of downloading the required job options and settings for the corresponding applications and installing them onto your Mac. This method ensures our customers that a correctly produced pdf will arrive at our location and thus streamlining the production process for all concerned.

In this guide, you will find the information necessary to download the files needed for InDesign, and instructions on how to load the job options and settings.

Using this document, you'll be guided through the process of creating "The Final PDF".

Downloading Instructions, Job Options and Settings

Please visit our web site at **www.bpg-usa.com** to download the presets and distiller settings needed to produce your final pdf's.

Simply select the download that corresponds to your application being used to create your documents. Once the download is complete, un-zip the stuff-it file and follow the instructions in this manual.

Downloads are now available for InDesign CS6 and Quark 9.

File Transmission: Using Fetch, WS_FTP, or similar FTP Transmission Software

Berryville Graphics FTP Site:

Please contact your Customer Service Representative.

Coral Graphics FTP Site:

Please contact your Customer Service Representative.

Offset Paperback Manufacturers FTP Site:

Please contact your Customer Service Representative.

InSite Prepress Web Portal:

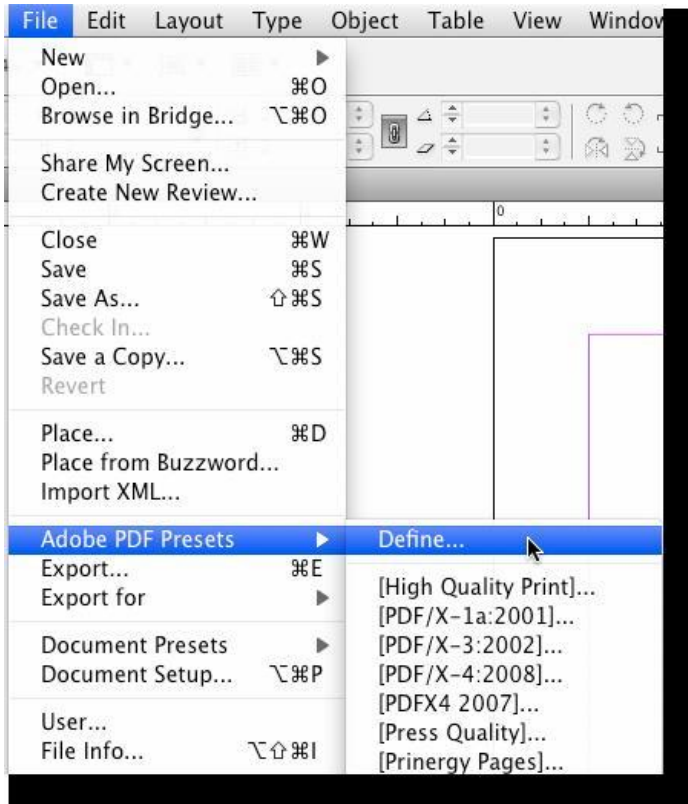

InSite is a web portal that allows our Customers to work with print jobs over the internet in real time, and is available at BVG, Coral and OPM. Please ask your Customer Service Representative for more information.

Acceptable Media:

CD, DVD

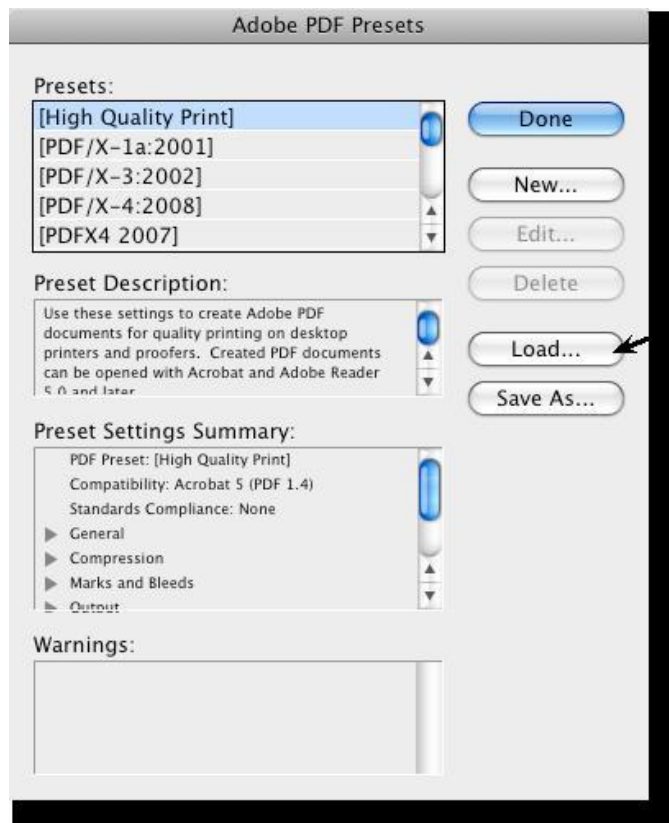

Clearly label all disks with your name and the name of the job.

InDesign Export to PDF

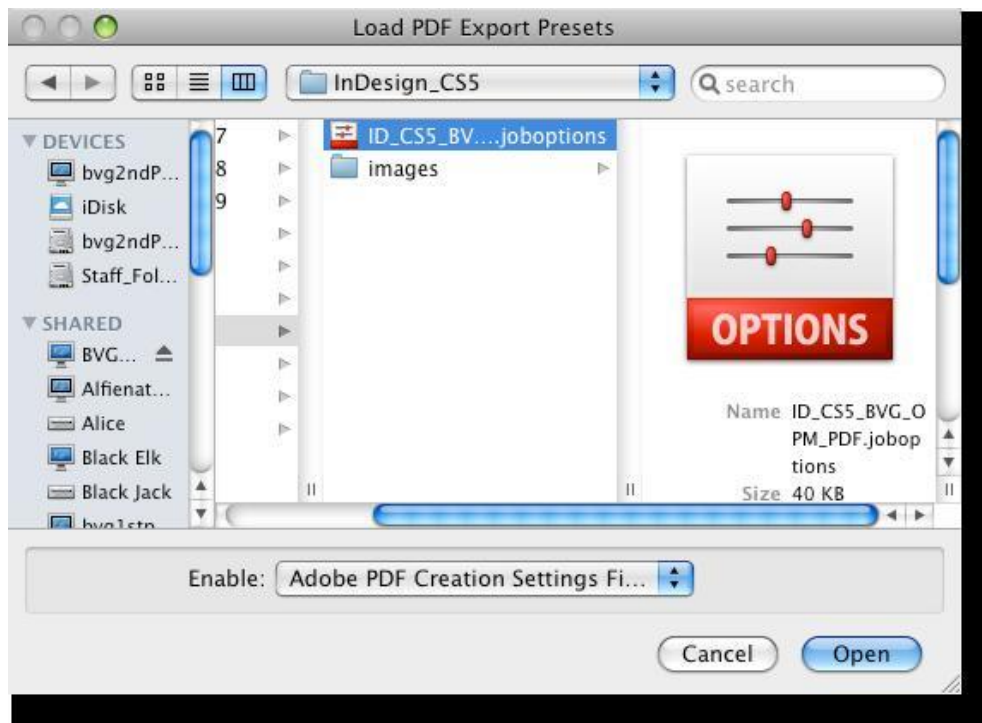

Loading the Downloaded Adobe PDF Pre-sets for Exporting to PDF in InDesign.

From InDesign, toggle to File/Adobe PDF Presets/Define...

Select the "Load" button.

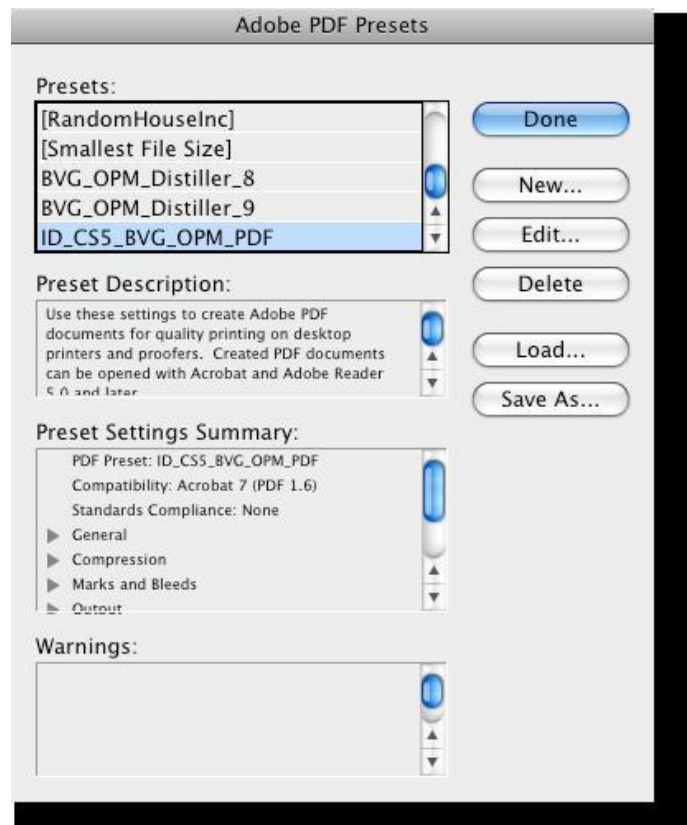

InDesign Export to PDF

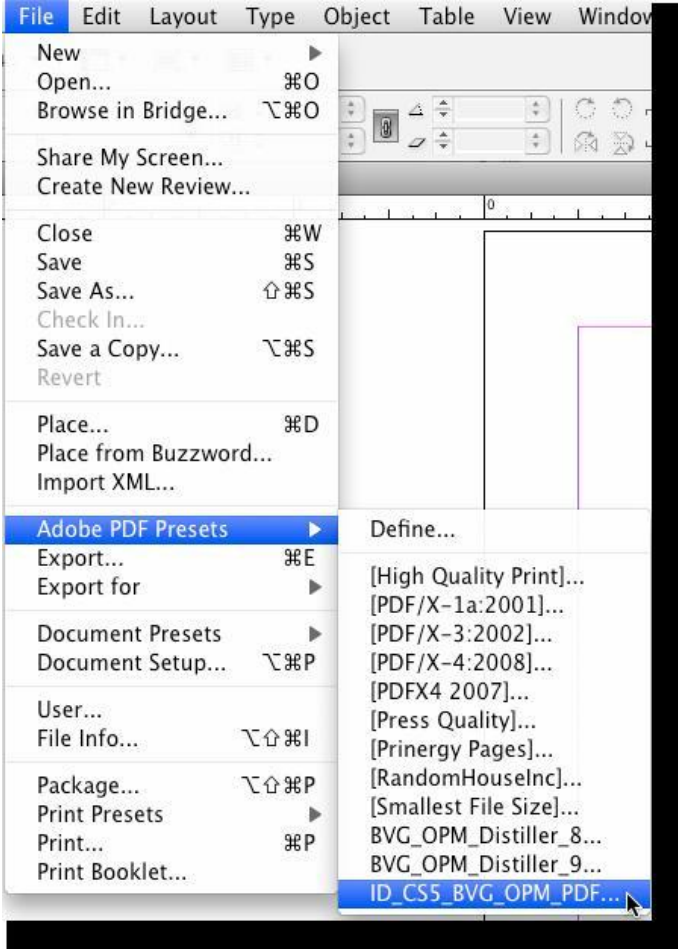

Browse to find the Downloaded Joboption file,
click Open.

Once loaded, the Preset will
be indicated in the list of
Presets. Click “Done”.

Remember, loading of the Preset only
needs to be done once in InDesign on
each machine.

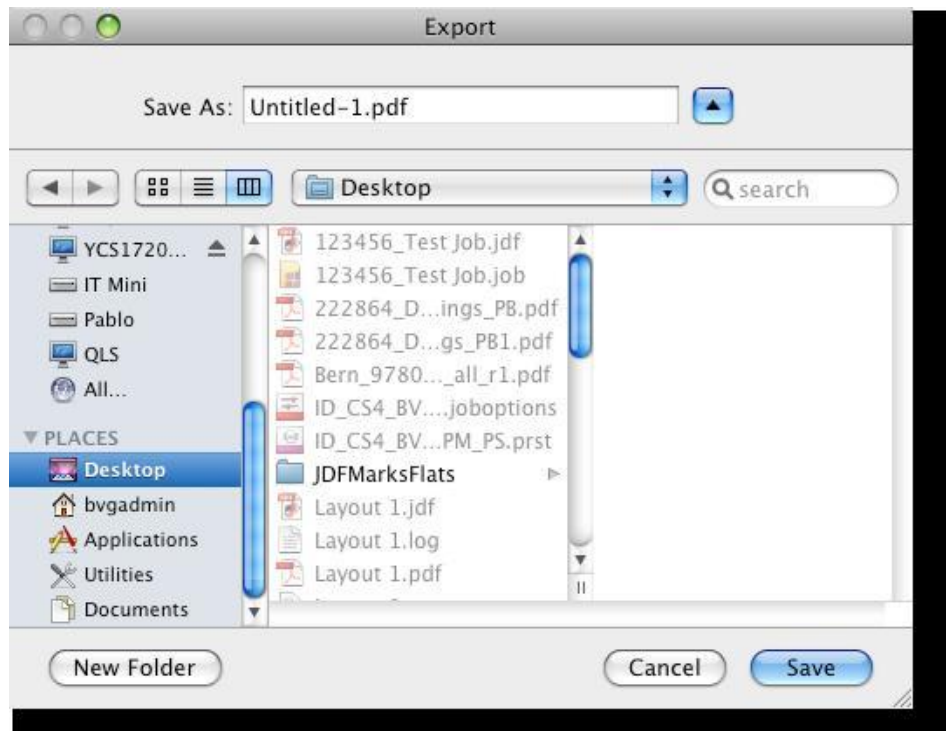

InDesign Export to PDF

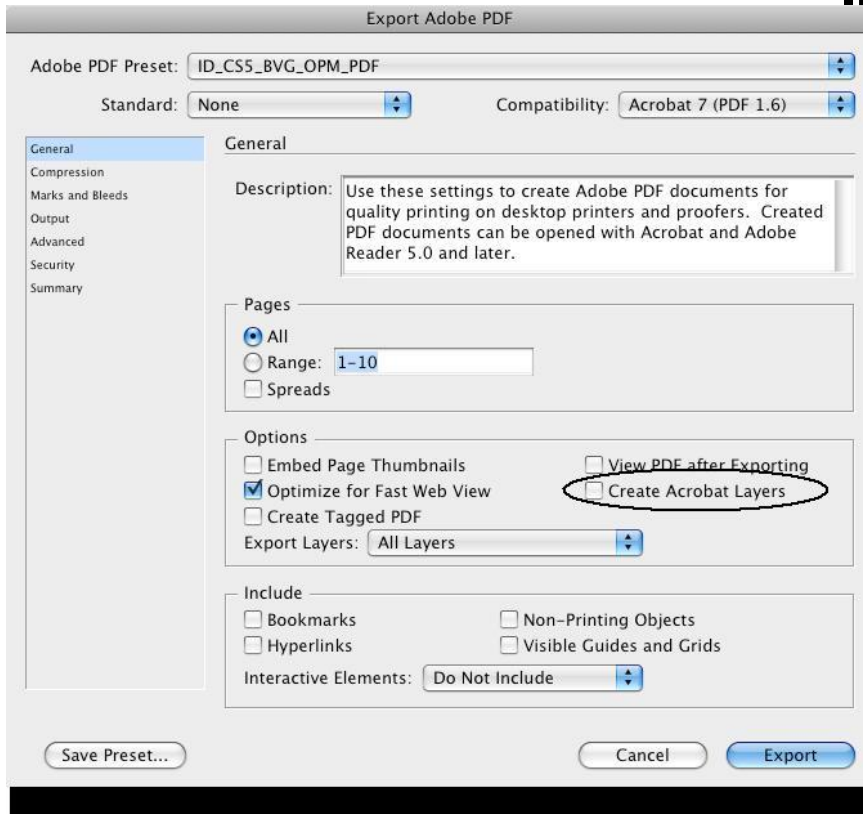

With your Final InDesign document open, please verify that all links to images are made and there are no missing fonts. Select File/Adobe PDF Presets/ "ID_CS?_PDF..."

In the Export Window, browse to your destination folder, name your final PDF and click "Save".

InDesign Export to PDF

The PDF Preset Preferences will open. Please do not change any of these settings unless you are creating a layered pdf, or changing bleed specifications.

If a layered pdf is needed, then select the “Create Acrobat Layers” box.

If bleeds need to be altered for book/text work, see below.

Bleed Specifications:

If you are creating text with facing pages, toggle to the Marks and Bleeds section, and under Bleed, change the “Inside” bleed to 0. This will ensure that any image on the gutter side does not bleed to the opposite page.

Click on “Export”.

A progress window will appear and when completed, you can find your final PDF in the destination folder.
